

For our Hiddenhausen site, we are looking for a

WORKING STUDENT

AVIATION (M/W/D)

YOUR TASKS

- Largely independent raw materials research
- Formulation development for an innovative, sustainable corrosion protection coating
- Preparation of lab samples, including preparation of the coating material and application on test panels
- Implementation of performance-tests according to various test protocols
- Comprehensive documentation of all steps and results
- Collaboration with internal and external partners (colleagues, research institutes, raw material suppliers, customers)

YOUR COMPETENCES

- Independent researcher
- University of (applied) science
- Chemistry background
- Coatings background preferred
- Familiar with corrosion inhibiting analysis techniques (as mentioned in the specifications, but also in more advanced techniques used in the field of corrosion research)
- Interest in corrosion protection of light-weight materials
- Curious, creative and innovative
- Structured
- Team-player
- German and English fluently
